In school, the three Rs are reading, writing, and arithmetic. In conservation, the three Rs are reduce, reuse, and recycle. **Reduce** is when you turn off lights when you aren't using them and walk instead of riding in a car. It also includes reducing ignorance of the environment by sharing your knowledge with others. **Reuse** is when you use something more than once like turning jelly jars into vases, but it also can mean things like carpooling where more than one person is using the same thing at the same time. **Recycle** is the last, but definitely is not the least. It is when used products are made into new things. Buying recyclable and recycled products are a great way to help your environment. Just remember the three Rs of conservation, and you are well on your way to helping our world. For more information on how you can help, go to the U. S. EPA Climate Change Kids Site at <http://epa.gov/climatechange/kids/difference.html>.

MEMBERSHIP SONG

(To the tune of the Dr. Pepper Commercial)

I'M A MEMBER

I'm a C.A.R. member and I'm proud
'Cause I'm part of an original crowd
Ask any member and he'll say
Only C.A.R.'s feel that way.

CHORUS:

I'm a member, he's a member
She's a member, we're a member
Wouldn't you like to be a member too?
I'm a member, he's a member
She's a member, we're a member
Wouldn't you like to be a member too?

All around the world these days

There seems to be a brand new member craze
Ask any member and he'll say
Only C.A.R.'s feel that way

CHORUS:

(following chorus) Come be a member
Come be a member — be a member.
